

User instruction for cleaning the optical test units of coin separator

Please take off the coin channel from the coin module. Now take out the cleaning tool from the sachet and clean the optical unit. You have to insert the tool from the under side into the test unit (see the picture).

Attention: While insertion the cleaning pad has to face upwards!

Please move the tool through the channel in such a way that the pad can be seen from the upper side. After the cleaning dispose of the tool. Please put the coin channel on the coin module. The machine is ready for use immediately after cleaning.
